RE: Final Mound B Work Plan
November 2000
Kin-Buc Landfill Superfund Sit

Dear Mr. Joyce:

The U.S. Environmental Protection Agency (EPA) is in receipt of the document referenced above.

The document is approved contingent to the following:

- The New Jersey Department of Environmental Protection (NJDEP) needs to be contacted immediately to determine what permits equivalencies are needed, including that for the use of wastewater effluent from the treatment plan as a means of irrigation.
- The number for EPA's Regional office, to be included in Table 11-1 of the Site-Specific Health and Safety Plan, is 732-548-8730.
- Please correct the following volatile organic parameters from section Table 1-3 of the Quality Assurance Project Plan:
Tetrachloroethylene instead of Tetrachloroethene and
Trichloroethylene instead of Trichloroethene.

In addition, please be reminded that, although at the beginning of the intrusive work EPA and SCA representatives will establish day-to-day protocols for what needs to be unearthed, in the event of an impasse during field activities, EPA's determination will be final.

Please submit the project start date within ten business days of the receipt of this letter.

Should you have questions regarding this issue, please contact John Prince or Grisell V. Díaz-Cotto, both of my staff, at 212-637-4380 or 637-4430

Sincerely,

A handwritten signature in cursive script, appearing to read 'Carole Petersen', written in dark ink.

Carole Petersen, Chief
New Jersey Remediation Branch
